The Program Designed to Save

Why Let DCTC Take the Lead in Training?

Major Advantages:

Cost Containment

At \$199.95 for the combined Health & Safety, Medication Administration and Your Company Procedural Orientation, 100 employees in the course of a year would cost less than \$20,000.00, including all printed materials. Can you hire a qualified, full-time trainer for that amount? Hardly. Details follow....

Service Bureau Advantages

Reliability & Objectivity

No calling in sick from DCTC, we're there for trainings, in-services and orientations whenever needed; a reliable and responsive team.

No favoritism, no nepotism. Since we are not involved in the selection of your personnel process, there will never be preferential treatment. We measure exact response and report just that to you.

Efficiency

What we Cover During Orientations and In-Service Sessions for You:

- Your Operation

Orientations Including Health & Safety Items and Medication Administration for as little as \$199.95 per attendee. Price affected by location and content. Call or e-mail for details.
info@directcaretraining.com

So 100 employees ends up costing you around \$19,000.00 per year. Can you hire a full-time trainer for that?
